Technical requirement

- Material: 1060 aluminum bar, anti oxidation, 2.5mm thick
- Appearance requirements: The product is intact without any damage, and the surface is smooth without burrs;
- Unmarked dimensional tolerances shall be in accordance with the conventional tolerance table; The unmarked form and position tolerances are based on GB/T 1184-K grade;
- Material temperature resistance: -40~+100 °C, performance meets the relevant provisions of GB/T 7141;
- The chemical corrosion resistance of the product meets the relevant regulations of ISO-16750-5-2010;
- This product complies with RoHS 2.0;
- Environmental requirements. The product must comply with our company's "Environmental Hazardous Substance Control Standards for Parts"
