Szerelés előtt áramtalanítson!**

- A lámpatest biztonságos üzemeltetése csak akkor garantált, ha az utasításokat gondosan követik.
- A telepítés során kerülje el a kenőanyagok, például olaj, zsír vagy bármilyen származék használatát.
- A lámpatestet soha nem szabad szigetelő vagy hasonló anyaggal borítani.
- A lámpatest elé ne helyezzen semmilyen tárgyat.
- Tartsa a terméket gyermekektől vagy illetéktelen személyektől távol.
- Ez a termék csak fix rögzítésre alkalmas.
- A készülék használata előtt meg kell győződnie arról, hogy az összes csavar megfelelően van-e meghúzva.
- A búra nem lehet nyitott, és a fényforrás nem cserélhető.

The safety of the light fitting is only guaranteed if the instructions are followed carefully and they must be kept for future reference.

Maintenance and installation procedures must only be carried out when the mains have been switched off.

During installation, avoid all use of lubricants such as oil, grease or any derivatives; such substances may cause damage to the plastic parts when in contact with them. The light fitting must never under any circumstances be covered with insulating or similar materials.

We are not liable for damage to property and people due to modification, tempering and use not in conformity with the technical characteristics of the product.

Application without power connection devices. For a rapid and safe connection to the electrical line, use a system that guarantees an IP65 protection rating.

Keep this product out of reach of children or any unauthorized persons.

This product is only suitable for fixed mounting.

Ensure the earth wire connected with the earth effectively to avoid electric shock or being damaged by lightning or thundering.

Do not mount the unit on a mast (pole).

Before using the device, must make sure the all screws are properly tightened.

Light cover cannot be open, and light source is not available to be replaced.
